

A Clean Bus Is a Safe And Healthy Bus

To Superintendents and School Administrators,

As you prepare to meet the challenges of a new school year during this unusual time, you are undoubtedly dealing with a long list of questions and concerns. Most likely, parents and others have many questions about school buses – Will my child be safe on a bus? Will the buses be clean? Can I trust the school bus driver to do the right thing?

The answer to all of those questions is: **Yes.**

At All-Star Transportation we have been preparing for weeks for the start of school. We have listened to the experts, and we have developed a set of protocols that we believe will keep our students and staff safe and healthy. In addition to the routine safety training that our drivers and monitors must complete prior to the start of every school year, this year we are also providing our staff with the training and tools they need to keep their buses clean and healthy.

To familiarize you with our process, here's a [link](#) to a training video that All-Star Transportation developed for its drivers and monitors. We also have created a handout about keeping students safe on the bus that you can copy or download by clicking this [link](#) to our website,

Please feel free to share these items with your staff, parents and others who may have questions about our school buses. And if you have any questions, don't hesitate to contact your local All-Star terminal manager.

Working together, we can keep our students safe and healthy.
